SPEED SLOT[™] Bi-Metal Hole Saws

Unproductive.

Unplugged.

SPEED
SLOT[™]

CUTTING THE HOLE IS PRODUCTIVE. STRUGGLING TO REMOVE THE PLUG ISN'T.

Introducing the new LENOX *SPEED SLOT* hole saw — it cuts wood 2X faster and lasts 2X longer when cutting through metal.* The job goes even faster with our revolutionary *SPEED SLOT*, which makes plug removal easy.

TRY IT YOURSELF AND BE MORE PRODUCTIVE. lenoxunplugged.com

*vs prior model

Go from unproductive to unplugged.

SPEED SLOT™

Plug Removal as Easy as 1-2-3

Cutting the hole is productive. Struggling to remove the plug isn't. Go from unproductive to unplugged with the new **SPEED SLOT** hole saw. The innovative **SPEED SLOT** design features a wide staircase slot with multiple leverage points on a taller hole saw to help you eject the plug in just seconds.

2X FASTER

Cuts Twice as Fast. Cool.

LENOX has engineered an enhanced tooth form featuring revolutionary T2™ technology, an advanced non-binding coating and a thin kerf design to remove less material, make faster cuts through wood and help you be more efficient on the worksite.

2X LONGER LIFE

Twice the Blade Life. Even Cooler.

The **SPEED SLOT** hole saw lasts 2X longer than the prior LENOX model when cutting through metal. The design upgrade cuts more efficiently and generates less heat to provide you with more cuts, fewer changes and greater productivity.

The new SPEED SLOT hole saw outperforms all competitors in metal cutting, wood cutting and plug removal

*The wide staircase slot includes **multiple leverage points** and is positioned lower on the hole saw to enable quick and easy plug ejection with a standard screwdriver*
