

NEW PRODUCT

Industrial Multi Directional NewTech Air Cooler

Specifications:

Part No	Motor	Air Flow	Tank Capacity	Consumption	Weight
PACIMD	1.1KW/240V	5000 L/S	300L	15L/H	105KG

FEATURES	ADVANTAGES	BENEFITS
Fully assembled	No installation or assembly work required	No tools required & minimal labour
Full function remote control	Convenient	Reduce workflow interruption
LCD control panel	Easily operated and monitored	No specific training required
Multi directional air outlet	Greater overall coverage of air flow	Can be centralised within work areas
Adjustable horizontal louvres	Ability to direct airflow	Control of the cool air flow
Variable fan speed	Efficient - uses less power	Cost savings
Fan only function possible	Dual purpose	Cooling or air circulation
Water level indicator	Able to monitor water levels	Continued cooling efficiencies
Removable panels	Ease of cleaning & maintenance	Increased product life
Portable on wheels	Easy to move and relocate	Ability to move to specific work areas
